d. Table 4: New Mountain Underground Construction Cost :

This construction approach is for the most challenging part of the mountain, where conventional directional boring cannot be done. Different drilling bits and equipment must be used (or example, an air hammer is used to break up solid rock and a rail head is attached to a directional drilling machine to break through scattered rock). In addition to the specialized equipment, it is more time consuming than standard boring. The majority of the mountain construction is aerial, and the majority of underground construction is typical underground meaning new construction.

APPENDIX O – Value Added Related Services plus Cost Model(s)

NOT APPLICABLE

APPENDIX P – E-RATE TERMS AND CONDITIONS

This RFP does contain E-Rate eligible services and/or products. The required Universal Service Administrative Company (USAC) Description of Services Requested and Certification Form, numerically known as a Form 470, has been filed by the **New Mexico Public Education (NMPED)** to include certain categories of E-Rate eligible products within the services for which this Request for Proposal is seeking contracts. The application number for Form 470 for this RFP is “**170046897**” available to the Local Education Authority also known as the Educational Institutions. The resulting contract(s) are intended to be in compliance with USAC’s definition of a State Master Contract and also known as Statewide Price Agreements for those services that contain E-Rate-eligible services and/or equipment. E-Rate ineligible services and products offered by the awarded Contractor(s) must be clearly labeled as such. It is the responsibility of each of the E-Rate eligible individual members of the Local Education Agency (LEA) Group and the awarded vendor and/or sales contacts for the awarded contract to follow all of the rules of the E-Rate Program including strict adherence to the most current Eligible Services List, as explained at <http://www.usac.org/sl/applicants/beforeyoubegin/eligible-services-list.aspx> . In the event a sales contact, internal or external, of the awarded contract misrepresents the eligibility of the service and/or products to the eligible E-Rate LEA Group Member, then that sales contact must be responsible to the applicant and E-Rate program concerning further financial retribution. If the sales contact providing misrepresentation is listed by the specific Contract Holder as an Authorized Reseller or subcontractor (external), then the Contract Holder will be held accountable and may be required to remove the provider from the authorized list. The New Mexico Educational Institutions has provided and will continue to provide guidance and assistance with E-Rate for individual LEAs and in statewide training opportunities.

The New Mexico Educational Institutions may elect to further E-Rate involvement through a consortium application process and may use E-Rate eligible services and/or equipment properly procured via this initiating RFP and related Form 470, to the extent the law allows. A contract(s) resulting from this RFP may be available to E-Rate eligible members for E-Rate FY2017 - FY2020 depending on program availability, rules and changes within State Law concerning bidding. Additional extensions may be available to the extent the law allows.

SERVICE PROVIDER IDENTIFICATION NUMBER (SPIN), FCC FORM 498

All sales contacts and/or authorized New Mexico Educational Institutions Resellers/Subcontractors interested in providing E-Rate eligible products from an awarded contract must obtain a Service Provider Identification Number (SPIN) through USAC by completing FCC Form 498 and maintain a proper standing in the E-Rate Program, as explained at <http://www.usac.org/sl/service-providers/step01/default.aspx> .

Vendors must demonstrate that they have not been disbarred from the E-rate program and that they are not in a “Red Light” status, as explained at <http://usac.org/cont/late-payments/default.aspx> . The SPIN should be included in the seller’s contact information.

E-RATE MINI BID/ MINI QUOTE

The competitive responses for internet access services for the New Mexico Educational Institutions may result in awards to multiple vendors. Based on this allowance, the New Mexico Educational Institutions reserves the right to award multiple contracts for any one service, if deemed necessary. However, it should be noted that if an individual LEA Group member(s) is purchasing a specific service that is eligible for E-Rate discounts and plans to request such discounts, they must choose the vendor that provides the most cost effective, with price being the most heavily weighted factor, means for providing the product or equivalent product across all Services awarded. If multiple sales contacts are available to provide the eligible service and/or product within the area, then the participant must follow the “mini-bid” procedures, as explained at <http://www.usac.org/sl/applicants/step02/state-master-contracts.aspx>, as required by Universal Service Administrative Company (USAC)/Federal Communications Commission (FCC). Failure to do so will jeopardize the individual LEA Group member’s E-Rate request. The individual LEA Group members must follow the FCC’s record retention rules as codified in Part 47 Section 54.516 of the Code of Federal Regulations. While the applicants are required to meet and be responsible for the E-Rate mini-bid process, the New Mexico Educational Institutions will provide access to an online tool that will be available for these applicants to post these mini-bid. The New Mexico Educational Institutions chooses to use the term “mini-quote” in lieu the term “mini-bid”. These terms may be used synonymously within this RFP and the New Mexico Educational Institutions. All contract sales contacts and/or New Mexico Educational Institutions Authorized Resellers/Subcontractors will be required to follow instructions and participate. The MiniQuote system is to become a requirement during the 2017 funding year. The miniquote system is not comprehensive of the vendor offerings, it is a sampling for comparison. Vendors should maintain a comprehensive web site of offerings. All submissions for the miniquote system must use a template supplied by NMPED To assist with this process and for the evaluation process of this RFP, a list of current schools and school systems with address and other demographic information is provided, See Appendix C and Appendix C-3.Part3-if applicable. The Qualified Responder will indicate which of these addresses that their submitted services and pricing will be available for orders and purchasing in the event an award is made to the Qualified Responder. E-rate does not allow vendors to change prices over the term of a contract. E-rate allows the vendor to quote bandwidth tiers above what the applicant requires for the first year of service on a multi-year contract and allows the applicant to upgrade tiers after between years without conducting a competitive bid. The awarded agreements resulting from the RFP requirements will provide more details regarding prices/cost... All prices quoted must be in place for the term of the contract. The mini

quote process is not required for all other non-“E-Rate” purchases but is considered a form of a best practice to obtaining the most cost effective means of providing the service or contract products.

E-RATE CONTINGENCY

Contract(s) resulting from this RFP are not contingent upon E-Rate Discounts awarded through the E-Rate Program. The New Mexico Educational Institutions are responsible for filing their own Form 471 and reference the Form 470 that NMPED filed. If the schools want to work with their public library or form a consortium, NMPED will work with those schools and libraries on a case by case basis. This may require assistance from the service provider(s). Quotes and pricing offers, based on the awarded contract, given to the eligible LEA Group member by the Contract holder’s identified Sales Contact may be contingent upon E-Rate awarded discount for the given E-Rate Funding Year at the discretion of the applying eligible LEA Group Member.

E-RATE PAYMENT PLANS

In the event a product or service from the awarded service contract has successfully been awarded, the E-Rate discounts applicable by USAC and the Service Provider Invoice method of discounts are to be applied. Then the service provider (contract Sales Contact) must bill the applicant for their share of the transaction at the same time any such invoice is sent to USAC for payment in accordance with FCC rules. In accordance with the FCC rules, the applicant must pay their share within 90 days of payment due date, as explained at <http://www.usac.org/sl/applicants/step06/obligation-to-pay.aspx> . The exception is if there is any special construction involved, the applicant has the option to request the service provider accept payments of the non-discount share of special construction charges in installments up to 4 years. Special construction charges are the engineering, design, project management and construction costs related to new fiber or microwave builds. The service provider will be responsible for filing the appropriate Service Provider required E-Rate forms, including but not limited to the following FCC Form 473, Form 474, Form 498, and Form 499. Service Providers are required to have a completed Form 473, service provider annual certification, for each relevant year before a Billed Entity Applicant Reimbursement (BEAR) Form known as the FCC Form 472 or the service provider (SPI) form known as the (FCC Form 474) will be paid. Additional information regarding forms instructions can be found at http://www.usac.org/_res/documents/sl/pdf/forms/FCC-Form-472-Instructions.pdf), http://www.usac.org/_res/documents/sl/pdf/forms/FCC-Form-473-Instructions.pdf , http://www.usac.org/_res/documents/sl/pdf/forms/FCC-Form-474-Instructions.pdf, http://www.usac.org/_res/documents/cont/pdf/forms/2013/FCC_498_Form-Instructions.pdf, and <http://www.usac.org/cont/tools/forms/default.aspx> .

E-RATE DISCOUNT INVOICING METHOD

The awarded contract holder providing E-Rate funded discounts on services must also work with the eligible LEA Group member to determine the best method of discount provisions allowed by the E-Rate program. In accordance with FCC rules the LEA will decide whether it prefers to invoice USAC via an FCC Form 472 or Form 474. The contract holder and applicant must work together to determine the best method to be used in the interest of the LEA Group member. The Service Provider(s) will follow the methods of invoicing as defined at link <http://usac.org/sl/service-providers/step05/default.aspx> to avoid nonpayment for services.

E-RATE SERVICE PROVIDER STATUS

Any contract holder, sales contact (company) or authorized New Mexico Educational Institutions Reseller that provides E-Rate eligible products within an awarded service contract must maintain a positive standing with the E-Rate program. They must maintain and provide upon request a Service Provider Identification Number (SPIN) that will correctly identify their business operations with the E-Rate program. In the event an eligible Telecommunications Service is offered as a product within the awarded service contract, the contract holder, as a sales contact or designated and the FCC to provide those services under the Telecommunications category of service.

Any contract holder, sales contact (company) or authorized New Mexico Educational Institutions Resellers that provides an E-Rate eligible product within an awarded service contract must avoid a “Red Light” status with the FCC.

E-RATE SUMMARY

All E-Rate purchases from the resulting agreements of this RFP by the LEA Group members should comply with E-Rate rules and regulations available at <http://www.usac.org/sl/> . Should the LEA Group member request assistance in the determination of E-Rate eligibility, they should refer to the USAC Web site and then contact the New Mexico Educational Institutions State E-Rate Coordinator’s office at the New Mexico Public Education Department if additional clarification is needed.

- Hand holes will be placed in accordance with standard industry practice following the specifications provided in the construction plans, typical drawings, and detail drawings. Special attention and planning must be exercised to ensure accessibility by other groups after construction has been completed.
- All hand holes unless otherwise stipulated by the drawings will be buried with 12" to 18" of cover at final grade.
- Immediately after placement, the soil around and over the hand hole will be tamped and compacted. Should any washouts occur, the respondent will be responsible for correcting the problem immediately without additional cost to the district.
- After cable placement all ducts will be sealed.
- All splice hand holes/manholes will be grounded
 - A minimum of 100' coil of cable shall be left in each hand hole/building for splicing use.

Splicing

- Fiber to fiber fusion splicing of optical fibers at each point including head ends is required.
- Complete testing services, such as end to end, reel testing, and splice loss testing, ORL, power meter/laser source testing and WDM testing is required.
 - Individual splice loss will be 0.10 dB for single-mode unless after 3 attempts these values cannot be achieved, then the fibers will be re-spliced until a splice loss within 0.05 dB of the lowest previous attempts is achieved. Splice loss acceptance testing will be based on the fusion splicer's splice loss estimator.
 - All cables to buildings shall be fusion spliced within a minimum of 50' of entering a building at a location to be determined by the owner with an existing single mode fiber and terminated at customer's rack.

Aerial Plant

District is open to aerial fiber runs using existing utility poles, but Respondent must adhere to pole owners' requirements for clearances, spans, grounding, guys and attachments.

Testing Cable

- The respondent shall be responsible for on-reel verification of cable quality prior to placement.
- Completed test forms on each reel shall be submitted to the district.
- Respondent assumes responsibility for the cable after testing. This responsibility covers all fibers in the cable.
- The respondent shall supply all tools, test equipment, consumables, and incidentals necessary to perform quality testing.
- The cable ends shall be sealed upon completion of testing.
 - In addition to splice loss testing, selected respondent will perform end-to-end insertion loss testing of single-mode fibers at 1310 nm and 1550 nm from one direction for each terminated fiber span in accordance with TIA/EIA-526-7 (OFSTP 7). For spans greater than 300 feet, each tested span must test to a value less than or equal to the value determined by calculating a link loss budget.

Restoration

- All work sites will be restored to as near their original undisturbed condition as possible, all cleanup will be to the satisfaction of the district and any permitting agencies.
- Respondent shall provide a brief description of restoration plan in the response, with the expectation that a more detailed restoration plan will be delivered prior to construction begins.
- Work site restoration will include the placement of seed, mulch, sod, water, gravel, soil, sand, and all other materials as warranted.
- Backfill material will consist of clean fill. Backfilling, tamping, and compaction will be performed to the

satisfaction of the district, the representative of any interested permitting agency, and/or the railroad representative.

- Respondent will be responsible for any restoration complaints arising within one year after the district's final acceptance.
- Excess material will be disposed of properly.
- Debris from clearing operations will be properly disposed of by the respondent/subcontractors as required by permitting agencies or the railroad. Railroad ties, trees, stumps or any foreign debris will be removed, stacked, or disposed of by the respondent as per requirements by other interested permitting agencies, and/or the district.
- Road shoulders, roadbeds, and railroad property will be dressed up at the end of each day. No payment for installation will be permitted until cleanup has been completed to the satisfaction of the any permitting agencies, and/or the district.
- Site clean-up will include the restoration of all concrete, asphalt, or other paving materials to the satisfaction of the other interested permitting agencies, and/or the district.

Documentation

- As Built Drawing will include:
 - Fiber Cable Route
 - Drawings, site drawings, permit drawings, and computerize design maps and electronically stored consolidated field notes for the entire route must be included in the documentation. The method of installation will dictate the additional types of documentation that should be provided. For example, documentation of aerial installation should include pole attachment inventories, pole attachment applications, pole attachment agreements between respondent and other utilities, GPS points of reference for utility poles, and photo images of poles to which fiber is attached. Documentation of underground installation should include conduit design, conduit detailing, manhole detailing, preparation of all forms and documentation for approval of conduit construction and/or installation, verification of as-built and computerized maps.

REFERENCES, STANDARDS, AND CODES

Specifications in this document are not meant to supercede state law or industry standards. Respondents shall note in their response where their proposal does not follow the requested specification to comply with state law or industry standard. The following standards are based upon the *Customer-Owned Outside Plant Design Manual* (CO-OSP) produced by BICSI, the *Telecommunications Distribution Methods Manual* (TDMM) also produced by BICSI, ANSI/TIA/EIA and ISO/IEC standards, and NEC codes, among others.

It is required that the respondent be thoroughly familiar with the content and intent of these references, standards, and codes and that the respondent be capable of applying the content and intent of these references, standards, and codes to all outside plant communications system designs executed on the behalf of the district.

Listed in the table below are references, standards, and codes applicable to outside plant communications systems design. If questions arise as to which reference, standard, or code should apply in a given situation, the more stringent shall prevail. As each of these documents are modified over time, the latest edition and addenda to each of these documents is considered to be definitive.
